

DB Dolly 10

Dutch Barrier’s Dolly 10 holds 10 folded straight sections and, through the use of stacking rings during storage and transport, has a height optimized for both loading capacity and crew ergonomics—making handling noticeably easier and significantly safer. Designed for efficient truck and container loading, it adds up to 20 extra meters of barrier per trailer compared to conventional loading plans.

- a state of the art aluminium barrier system, built for fast setup and optimised crowd control solutions -

Dutch Barrier’s founders and partners saw an opportunity to start afresh with an entirely new stage barrier design, preserving the best and improving the rest.

**Why.** We believe in quality, safety, and creating an unforgettable experience.

**How.** By leveraging the original creator’s combined experience to reinvent the best barrier system to date from the ground up.

**What.** Dutch Barrier® is a high-end, lightweight aluminium barrier system offering an innovative combination of straights, special sections, and storage solutions, available to rent or buy.

**Oh, and there’s one more thing...**  
We are a state-of-the-art engineering company where customer support is an integral part of the mission instead of an online promise.
